

COMMUNITY OF PRACTICE

ICTways

The place where all the teachers want to be!! Join us!!

<http://ictways.eu>

The ICTWays Community of Practice (COP) is a free online network for teaching and support in Primary and Secondary Schools, helping to build a community for creating, sharing and reusing teaching and learning materials and methodologies in the field of Sciences.

This COP was created as a development of the ICTWays project, and provides an inventory of existing ICT in Primary and Secondary and Vocational schools in Europe and the existing gaps in software and hardware, specifically for teaching and learning Sciences.

Inside the COP the partners and participants recommend best practices for using ICT in the classroom for science teaching, including guidelines for specific hardware and software particularly relevant for teaching Sciences in Classrooms.

Materials from the Annual Conference and Local workshops are also available in the COP

by SUBJECT

- Geography
- Geology
- Natural Sciences
- Mathematics
- Physics
- ICT and Technology
- Chemistry
- Biology

by LOCATION

- Lithuania
- Czech Republic
